To whom it may concern,

I am the constructor and owner of a unique home currently being built. Masotti Construction was highly recommended by Dan Amicone, our architect and I fully endorse the quality and expertise of their work. They were responsible for framing, installing windows, flashing, applying Blueskin and vapour barriers. They will also be installing interior doors and trim.

Marc Masotti provided detailed invoices and took the time to explain costs. He was readily accessible by phone, in-person and by e-mail. His employees are reliable and take pride in their work. They were quick to notice design omissions and recommended effective solutions to issues that have arisen.

I am very pleased with the exceptional quality of the work and I would highly recommend Marc Masotti to anyone building.

Sincerely,

William St. Pierre
